Detox Babe[®]

Take Care of Your Temple

Michigan-native cofounders Christina and Julie created Detox Babe after their lives were drastically disrupted.

Christina became ill from Lyme disease, and Julie survived a traumatic assault. For Christina, baths were medicinal and pain-relieving. For Julie, baths were a safe space where she could quiet her mind. During this time, they both realized the magical healing properties a bath could provide and, let's just say, they became obsessed. Once they replaced their pills with natural bath remedies, they went on a mission to help others heal, one hot bath at a time.

Detox Babe bath soaks will help keep your body healthy by eliminating harmful toxins and alleviating symptoms naturally. They are made with love using organic and highly-potent ingredients. Every ingredient holds a specific therapeutic purpose with your health in mind. Our ingredients are derived from Earth's remarkable botanical sources, and we do not use synthetic chemicals in any of our products allowing for maximum restorative potential.
